## Hardwood Molding Specifications & Information

Diagram / Dimensions	Description	Length
	<p><b>One Sided Reducer</b></p> <p>Reduce / transition down to flat surfaces (i.e. vinyl sheet flooring).</p>	<p><b>8'</b></p>
	<p><b>Baby Threshold</b></p> <p>Transition to carpet or other floor coverings which have a slight vertical height difference. Also used at sliding door areas. This most versatile trim piece can be adapted with the use of a table saw.</p>	<p><b>8'</b></p>
	<p><b>T Molding</b></p> <p>Used to transition one floor covering to another. Typically, ceramic tile with the same vertical height.</p>	<p><b>8'</b></p>
	<p><b>Base Shoe</b></p> <p>Installed after the floor against existing baseboard to allow proper expansion space.</p>	<p><b>Specify Length</b></p>
	<p><b>Stair Nosing</b></p> <p>Used for step construction when using plank or strip on stairs.</p>	<p><b>8'</b></p>
